

Lapeer Community Schools COVID-19 Daily Screening Tool

This tool was developed based on guidance from the Lapeer County Health Department.

Parents or caregivers are strongly encouraged to monitor their children for signs of infectious illness every day prior to sending students to school.

Daily Screening

Before leaving for school, please make sure to complete the following screening. If your child has any of the following symptoms, that indicates a possible illness that may decrease the student's ability to learn and put them at risk for spreading illness to others, please follow the guidance below.

Section One: Symptoms

- Temperature 100.4 degrees Fahrenheit or higher when taken by mouth
- Atypical sore throat
- **New** uncontrolled cough that causes difficulty breathing (for students with chronic allergic/asthmatic cough, a change in their cough from baseline)
- Diarrhea, vomiting, or abdominal pain
- New onset of severe headache, especially with a fever

Section Two: Close Contact/Potential Exposure

In the past 10 days has your child:

- Had close contact with a person with confirmed COVID-19 OR
- Had close contact with person under quarantine for possible exposure to COVID-19;

**Close contract is defined as being within 6 feet if unmasked or 3 feet if masked, of an infected person for 15 minutes or more.*

If the answer is **YES** to any of the questions in Section One AND **YES** to any of the questions in Section Two, call your healthcare provider right away to get evaluated and tested for COVID-19 and contact your child's school.

If the answer is **YES** to any of the symptom questions, but **NO** to any close contact/potential exposure questions, keep your child home from school and follow the following guidelines for return:

- Fever: at least 24 hours have passed with no fever, without the use of fever-reducing medications
- Sore throat: improvement (if strep throat: do not return until at least 2 doses of antibiotic have been taken);
- Cough/Shortness of breath: improvement
- Diarrhea, vomiting, abdominal pain: no diarrhea or vomiting for 24 hours
- Severe headache: improvement.
