

5th Grade Music Symbol Activity

Goal: Students will share with the class six different music symbols they found while exploring the music symbol flash cards.

I will use my name generator to pick the groups the first person picked will be the organizer of the presentation and the other two members can be recorders writing down the information on the music symbols that will be presented.

Process

Each group will receive a music group name for the day. Student groups will look through the music symbol flash cards. The group will then decide which six symbols they like the most and write down the definition of the six they like the most. Everyone will be part of the presentation.

I will just for fun record all of the terms and create a ballot and we will find what is the most popular music symbol.
