

Day Two observations vocal 68 Vocal songs.

Students have their lyrics and are working on accompaniments provided through Garage band. All but one group spent time practicing and making demos of their songs. One group was needing help on how they could now make a song with their lyrics. I discussed with them how lyrics need to have a rhythmic flow through the pattern of syllables and rhyming in the lyrics. They took that information and started working again. It appears most song will be in a rap style which I would guess this generation would consider as a standard song.
