

Free Pediatric Eye Screening

October 31 and November 1, 2 and 3 members of the Tolland Lion's Club will be offering a FREE Vision Screening through their **Connecticut Lions Kidsight Program** at Birch Grove Primary School. This pediatric screening designed for preschoolers ages 1-6 and uses a non-invasive scanner that is capable of screening for astigmatism, nearsightedness, farsightedness, lazy eye, misalignment of the eyes and pupil size anomalies in a 20 second scan with a hand held camera. The camera is held 3 feet from your child and they can sit on your lap. Nearly 15% of all children scanned are found to have a problem that needs a referral for further treatment. The earlier a problem is diagnosed the greater the chance their vision will be normal or near normal by age 7. You can view "[Lions help save Cross's sight](#)" on You Tube to see the impact this valuable screening can have.

For more information contact Steve Gudernatch (860) 875-9774.

To reserve your spot for a screening call Laurel Leibowitz at Tolland FRC (860) 870-6750 x 30215 or email lleibowitz@tolland.k12.ct.us
