Mastery Learning Information

The districts core values of providing individualized attention to a student's needs, supporting a student and their family, and providing a transformational experience leading to continual growth are all crucial aspects of 21st century education in the literature, and espoused by the State of Connecticut (<http://www.sde.ct.gov/sde/cwp/view.asp?a=2767&q=336508>).

As Tolland competes with magnets and charters, and seeks to draw more students to its own programs and pathways of study, Mastery Learning practices will support those endeavors as it is grounded in contemporary philosophy and research. For an overview of 21st century educational philosophy, research, and practice please see the information below:

Equity
over
Equality

Stimulate and Support
over
Rank and Sort

Transformative Practice
over
Tradition

Equity over Equality

Educational professionals that practice mastery learning recognize that different students have different needs. This necessitates providing each learner with what is uniquely required for that person's success. While equality implies *sameness*, equity implies *fairness*. Equity is about making sure people get access to the same *opportunity*. Advantage, opportunity, and privilege associated with socioeconomic, racial, cultural, or historical factors can impact learning. It is the mission of all educators to do our best to provide each learner with opportunities to succeed that transcend disadvantage.

Stimulate and Support over Rank and Sort

Educational professionals that practice mastery learning recognize that students do not come to school having experienced the same level of preparation and opportunity. As a result institutional **ranking and sorting** can inadvertently stigmatize, de-motivate, and perpetuate the trajectory the initial limitations on opportunity created. Educators try to help students overcome this, and institutions have to be structured so student success is less reliant on the individual heroics of some educators, and more on *systematic* and consistent *processes and practices* of the institution that provide the greatest opportunities for restorative justice, productive habits, and academic success.

Standardized assessments beyond those used as universal screens (assessments given to all learners for the purpose of providing specialized assistance), or those that can be used to impact instruction (progress monitoring), should be carefully evaluated for their usefulness in the process of educating children. The objective should always be to benefit the child, and to do no harm. For instance, if poverty correlates significantly with lower state standardized test performance, how many times is it necessary to report to a

disadvantaged child and family that they are performing poorly before institutional processes are put in place to address the challenge? In other words, some standardized tests tell us what we already know – and in the process jeopardizes the confidence and self-concept of the learner. Instead, assessment focused on *progress monitoring* over one-shot standardized assessments, provide the most useful and actionable information for improving the performance of all students.

Transformative Practice over Tradition

Educational professionals that practice mastery learning question current assessment traditions, and seek to transform teaching and assessment with a focus on practices that have the greatest chance of increasing student agency, ownership, reflection, and motivation of students towards their own learning and development. Mastery learning is recognized as a crucial aspect of SRBI (<http://www.sde.ct.gov/sde/cwp/view.asp?a=2618&q=322020>) supports, and as such practitioners take into consideration developmental level and cognitive considerations of students when delivering instruction, remediation, and methods of encouraging habit change. It is the process of doing things because they work for students, not simply continuing “traditional” practices because it is what has always been done.

Areas of *emphasis* for Tolland

1. All forms of assessment are standards-based and criterion-referenced, and success is defined by the achievement of expected standards, not relative measures of performance or student-to-student comparisons.
2. Formative assessments measure learning progress during the instructional process, and formative-assessment results are used to inform instructional adjustments, teaching practices, and academic support.
3. Summative assessments evaluate learning achievement, and summative assessments results record a student’s level of mastery at a specific point in time.
4. Academic progress and achievement are monitored and reported separately from work habits, character traits, and behaviors such as attendance and class participation, which are also monitored and reported.
5. Academic grades communicate learning progress and achievement to students and families, and grades are used to facilitate and improve the learning process.
6. Students are given multiple opportunities to improve their work when they fail to meet expected standards.

New Date for Teen Poetry Slam

The Tolland Public Library Foundation has postponed its seventh annual teen poetry slam from Thursday, April 5 to Thursday, May 10 to give poets more time to enter.

A minimum of five poets are needed for the event to be held and not enough students had signed up in order to hold the slam this week.

The slam will now be held on May 10 at 6:30 p.m. at the Tolland Public Library at [21 Tolland Green](#).

The event is open to middle and high school students aged 12 to 18 from Tolland and surrounding towns. For details and entry forms, visit the library or TollandPublicLibraryFoundation.org.

Completed forms are due Monday, May 7 and can be dropped off at the town library, the Tolland Middle School and Tolland High School libraries, with any Tolland High English teacher or they can be emailed to Foundation Secretary Kate Farrish at katefarrish@gmail.com.
